PROFESSIONAL SUMMARY

Full-stack AI engineer with 2+ years of professional experience building and shipping AI-native products end-to-end — from data pipeline to polished UI — at ZS Associates and Bain & Company. Proficient in Python, React, Next.js, PostgreSQL, Docker, and the Anthropic Claude API — indi's exact stack — with hands-on experience in Pydantic-based structured output pipelines, RAG systems, and agentic AI workflows. Built and shipped four live AI products independently, including SensAI, a full-stack AI platform with a personal AI-assisted development workflow that accelerates shipping. Cares deeply about the societal impact and ethics of AI work. Comfortable working from database schema to AI pipeline to polished UI without hand-offs. Master of Computer Science, University of Sydney.

KEY SKILLS

- **AI Agents & LLMs:** Claude API, OpenAI, Gemini, LangGraph, LangChain, MCP, Multi-agent orchestration, RAG pipelines, Vector databases, Prompt engineering, Pydantic structured outputs
- **Full-Stack:** Python (FastAPI, pandas), React, Next.js, TypeScript, JavaScript, HTML5, CSS, Tailwind CSS, React Native (exposure)
- **Cloud & DevOps:** AWS (Lambda, ECS, S3, API Gateway), GCP (BigQuery, Firebase), Azure, Docker, GitHub Actions CI/CD, Vercel, Railway, Serverless
- **Automation & Data:** n8n workflow automation, Webhooks, Event-driven systems, ETL/ELT pipelines, PySpark, Databricks (commercial), SQL, Data engineering
- **Working Style:** Claude Code (daily), Cursor, Clean documented code, Direct communication, End-to-end ownership, Fixed-scope or ongoing contracts
- **Delivery:** End-to-end feature ownership, Eval frameworks, Mission-led product thinking, Early-stage startup pace

PROFESSIONAL EXPERIENCE

ZS Associates Sep 2022 – Jan 2024
Data & Software Engineer New Delhi, India

- Designed and built production agentic AI systems using Claude API, LangGraph, and MCP — multi-agent orchestration, tool-use, semantic memory, and RAG pipelines — delivering measurable outcomes for enterprise clients across 5–10 global environments.
- Designed PostgreSQL and Redis-backed API services on AWS (Lambda, ECS, S3), ensuring high availability, cost optimisation, and production-grade scalability across distributed microservice architectures serving global enterprise clients.
- Built n8n workflow automations, webhook pipelines, and REST API integrations across client tools and third-party services. Delivered data engineering work using PySpark and Databricks on commercial-scale datasets.

Bain & Company Feb 2022 – Aug 2022
Software Engineer New Delhi, India

- Delivered production software at Bain & Company working directly with client stakeholders. Took requirements, wrote the code, and shipped it. No hand-holding required.
- Developed judgment about societal impact and data ethics delivering client-facing systems handling sensitive business data in regulated, high-accountability environments.

SELECTED PROJECTS

AI PR Reviewer pr.tanishqrana.online
Python, FastAPI, LangGraph, Claude API, PostgreSQL, Redis ARQ, Docker, GitHub Actions
HMAC-verified webhook ingestion, async Redis job queue, multi-step Claude orchestration, Pydantic-structured outputs, PostgreSQL audit logging, full CI/CD. Live, maintained, real users.

VisaGuard visaguard.app.tanishqrana.online
Python, FastAPI, React, Next.js, TypeScript, Claude API, PostgreSQL, Docker, GitHub Actions, GCP
React/Next.js frontend, Python/FastAPI backend, LLM-powered data pipeline, cloud deployment. Built solo, end-to-end, currently maintained.

TeachSmart teachsmart-production.up.railway.app
React, Node.js, TypeScript, Groq AI, REST APIs, Railway
Full-stack AI product across 8 languages. Fast turnaround. In production, serving real users.

EDUCATION

University of Sydney Completed Dec 2025
Master of Computer Science — *Machine Learning, AI Systems, Data Engineering, PyTorch* Sydney, NSW

Guru Gobind Singh Indraprastha University 2018–2022
Bachelor of Technology – Computer Science New Delhi, India
